

BAXI S.p.A.

SPARE PARTS CATALOGUE

- EDITION DICEMBER 2005 -

COME SI CONSULTA IL CATALOGO RICAMBI

Dopo le tavole esplosi caldaie si trovano le liste dei componenti delle caldaie, suddivise in varie colonne, con il seguente significato:

Pos.	Numero di identificazione del componente nella tavola esploso della caldaia.
Descrizione	Breve descrizione del componente.
Code	Codice BAXI S.p.A. del componente.
Tab. XX	XX è il numero della tavola esploso caldaia riferita al modello in esame.
From serial number	Data (anno e settimana) di inizio produzione di un componente (prime quattro cifre della targa matricola caldaia). Esempio: B005: anno 2000 (B indica il decennio 2000-2009; 0 indica l'anno) - 5^a settimana . Se la casella è vuota significa che il componente è in uso dall'inizio produzione del modello di caldaia.
To serial number	Data (anno e settimana) di fine produzione di un componente (prime quattro cifre della targa matricola caldaia). Esempio: B012: anno 2000 – 12^a settimana (N.B. la data di fine produzione è da considerarsi indicativa). Se la casella è vuota significa che il componente è ancora in uso.
Interchangeable	Intercambiabilità tra nuovo componente entrato in produzione e vecchio componente uscito dalla produzione. YES: il nuovo componente è intercambiabile con quello vecchio. NO: il nuovo componente <u>non</u> è intercambiabile con quello vecchio.

HOW TO READ THE SPARE PARTS CATALOGUE

In the spare part catalogue, after the exploded diagrams, there are the components lists of the boilers; this is the meaning of the different columns:

Pos.	Identification number of the component in the exploded diagram of the boiler.
Description	Short description of the component.
Code	BAXI S.p.A. code of the component.
Tab. XX	XX is the exploded diagram number of the boiler taken into consideration.
From serial number	Date (year and week) identifying the beginning of production of a component (taken from the serial number of the boiler). e.g. B005: year 2000 (B identifies the decade 2000-2009; 0 identifies the year) – 5th week . If the box is empty, the component is in use from the beginning of production of the boiler.
To serial number	Date (year and week) identifying the end of production of a component (taken from the serial number of the boiler). e.g. B012: year 2000 (B identifies the decade 2000-2009; 0 identifies the year) – 12th week . If the box is empty, the component is still in use.
Interchangeable	It identifies the interchangeability between the new component and the old one. YES: components are interchangeable. NO: components are <u>not</u> interchangeable.

BAXI

NOTE :_____

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

The BAXI logo is rendered in a bold, blue, sans-serif typeface. The letters are thick and closely spaced, with a slight shadow or depth to the characters.
